Essentials and Best Practices

David Sabalete Rodríguez

Full-Stack Developer | JavaScript · Node.js · Nuxt · TypeScript · AWS | Web & Cloud Solutions
Greater Barcelona Metropolitan Area

Summary

I am a Front End Developer and Data Analyst. With a degree in Industrial Technical Engineer, I quickly focused on the programming field and especially web-related technologies. I have worked for a long time using Java and HTML, CSS and Javascript. Although I have been involved in the programming world since 2000 in different languages and frameworks, in 2010 I started deepening in Javascript frameworks like MeteorJS, BackboneJS, React and finally VueJS which I fell in love with.

Throughout my professional career I've developed an interest in the analysis and I earned the Google Data Analytics Certificate in June 2023. In this course I learned how to analyse data, data cleaning, data visualizations, R programming, data-driven decision making, calculation and analysis using SQL and spreadsheets, and how to create effective presentations.

With regard to project management methodologies, I know Scrum and Kanban.

Experience

LoveToKnow Media Spain
Fullstack Developer
November 2019 - January 2026 (6 years 3 months)
Barcelona Area, Spain

Frontend development for YourDictionary.com product using NuxtJS, focused on A11y, performance and SEO improvements.
